

# Environmental Policy

## Introduction

Mises SA is committed to operating its business in a manner that promotes environmental sustainability, complies with applicable environmental laws and regulations, and minimizes its environmental footprint. Our environmental policy is designed to ensure that we take responsible actions to protect the environment across all areas of our operations. This includes obtaining necessary environmental permits, reducing pollution, conserving resources, managing hazardous substances, and minimizing waste and emissions.

## 1. Environmental Permits and Reporting

Mises Sa will obtain and maintain all required environmental permits, approvals, and registrations, and ensure compliance with all applicable environmental laws and regulations. We will maintain accurate and complete records of our environmental performance and submit timely reports to regulatory authorities where necessary.

- Regularly review and update environmental permits as our operations evolve.
- Ensure all regulatory reporting obligations are fulfilled accurately and on time.
- Conduct internal audits to ensure compliance with environmental laws and permits.

## 2. Pollution Prevention

We are committed to preventing pollution by adopting processes and technologies that reduce the environmental impact of our operations. This includes reducing emissions to air, land, and water and minimizing the release of pollutants.

- Implement pollution prevention strategies, including the use of cleaner technologies and materials.
- Monitor and control pollution levels through regular assessments and corrective actions.
- Establish emergency procedures to manage and mitigate accidental releases.

### **3. Resource Conservation and Reduction**

We recognize the importance of conserving natural resources and will work to reduce our use of energy, water, and raw materials. Efficiency measures will be integrated into our operations to reduce waste and improve sustainability.

- Set goals to reduce energy and water consumption across all facilities.
- Implement resource-saving technologies and encourage recycling and reuse of materials.
- Promote awareness of resource conservation among employees and business partners.

### **4. Hazardous Substances**

We are committed to minimizing the use of hazardous substances in our operations. Where the use of hazardous materials is unavoidable, we will manage them responsibly to prevent harm to the environment and human health.

- Maintain a hazardous materials management system to track, handle, and dispose of hazardous substances safely.
- Ensure compliance with relevant legislation on the handling, storage, and disposal of hazardous materials.
- Train employees on the safe handling of hazardous substances and emergency response measures.

### **5. Wastewater Management**

Mises SA will manage and treat all wastewater generated from our operations to meet or exceed local regulatory standards. We will work to reduce the volume of wastewater and improve the quality of water discharged from our facilities.

- Monitor wastewater discharge to ensure compliance with environmental permits.
- Implement water-saving technologies to reduce the amount of wastewater produced.
- Identify opportunities for water recycling and reuse within our operations.

### **6. Solid Waste Management**

We are committed to reducing the amount of solid waste generated from our operations through recycling, composting, and other waste reduction measures.

- Implement a waste management system to minimize waste generation, maximize recycling efforts, and ensure proper disposal.
- Promote the reduction, reuse, and recycling of materials in all aspects of our operations.
- Partner with suppliers and customers to reduce packaging waste and encourage the use of recyclable materials.

## **7. Air Emissions**

We aim to minimize air emissions from our operations through process optimization, the use of clean technologies, and regular monitoring.

- Monitor and control air emissions to comply with regulatory requirements.
- Use cleaner fuels, improve energy efficiency, and implement measures to reduce emissions of greenhouse gases (GHGs), particulate matter, and volatile organic compounds (VOCs).
- Set and review targets for continuous improvement in reducing air emissions.

## **8. Product Content Restrictions**

We are committed to ensuring that the products we distribute meet or exceed applicable environmental standards for restricted substances, such as hazardous chemicals or materials that may pose risks to human health or the environment.

- Ensure compliance with product content regulations such as RoHS, REACH, and other applicable standards.
- Work with suppliers to reduce the use of restricted or harmful substances in the products we distribute.
- Regularly review product content policies and collaborate with manufacturers to seek more environmentally friendly alternatives.

## **9. Continuous Improvement**

We will continuously seek opportunities to improve our environmental performance through innovation, stakeholder engagement, and proactive environmental management.

- Set measurable environmental objectives and targets and track our performance over time.
- Conduct regular reviews of our environmental practices and implement corrective actions where needed.
- Engage with employees, suppliers, and customers to promote environmental stewardship across our value chain.

## **Conclusion**

Mises SA is dedicated to reducing its environmental impact and promoting sustainable business practices. By integrating environmental responsibility into our daily operations, we strive to contribute to a healthier planet for future generations.

This policy will be regularly reviewed and updated to reflect our commitment to environmental sustainability and to ensure compliance with evolving regulations and best practices.
